

TSUBAKI FOOD GRADE LAMBDA CHAIN

Uses *NSF-H1 Approved Lube*
NSF-H3 Approved Anti-Rust Oil

Lube-free Conveyor Chain

Our Food Grade Lambda Chain uses NSF* H1 and H3 certified lube and anti-rust oil, which conform to FDA regulations 21CFR178 and 3570 and 21CFR178 and 860, respectively.
*NSF: A third party organization that has provided H1 certification since 1999 in place of the USDA.
H1: Lube for use in situations of incidental contact with foodstuffs.
H2: Lube that will not come in contact with foodstuffs but will be used in food processing facilities.
H3: Edible lube and anti-rust oil.

Features of the Food Grade Lambda Chain

- **Greater Safety**.....
This Lambda Chain uses lube and anti-rust oil that has cleared NSF-H1 and H3 certification, making it safe to use in food manufacturing facilities. This further enhances to our customers' safety improvements in PLP and HACCP systems.
- **Clean**.....
Our chain's odorless/colorless lube contributes to better cleanliness at food manufacturing facilities.
- **Wide Selection**.....
The chain can be used with RSC40-60 single pitch and RFC2040-2060 double pitch attachment chains.
- **Identifying Marks**.....
Approx 30% of outer link plates have an "FG" mark stamped on them, making it easier to distinguish them from standard Lambda Chain designs.
