

NEW IMPROVED

RS[®] Roller Chain 'G7'

A Solid Difference Means
Better Performance

Innovation puts Tsubaki G7 ANSI Chain in a league of its own.

- Superior Wear Life
- Increased kW rating
- Customer friendly

RS® Roller Chain 'G7'

Our 7th model upgrade in 90 years of service. Pursuing the ultimate in quality, Tsubaki has created the world's highest standard of roller chain.

Customer friendly

Stamping: Easy identification. The "TSUBAKI" and the "RS" are both stamped.

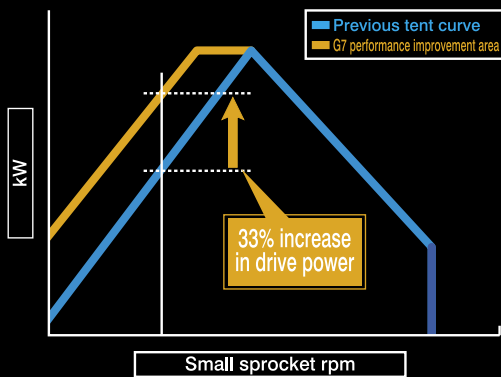

Box: Chain photo on box. Easy handling. Wave edges.

Superior Wear Life

Tsubaki LG (Lube groove) solid bushings are precise round cylinders. Our special lube grooves hold oil at the point of contact, where chain needs it most. The result? Chain lasts longer with less maintenance over the life of the chain.

kW Ratings (RS80 size)

Increased kW rating

Tsubaki ANSI chains handle up to 33 percent more horsepower so you can increase drive performance without increasing chain size. And, depending upon your specific application, you may be able to transmit the same kW with a smaller chain size!
